A RISING STAR IN BRITISH ART

## STEPHEN FORD

“For me, being an artist is about self-exploration and then learning to make that self-exploration about something bigger than oneself.”

These complex and beautiful animal portraits represent a statement of intent about our future, carrying a message of optimism and belief which resonates with art lovers across the country.

Stephen creates a compelling connection with the viewer which is enhanced by the unsettling reality we see in the eyes of his subjects, as well as by the deliberately flat and impenetrable grey backgrounds. These remove any sense of context, raising questions about where each of his subjects is able to exist in our shared environment.

With the titles of these pieces, Keep the Faith and Look to the Future, Stephen offers us an optimistic message to inspire and uplift us as we go forward together.

## MARK CURRYER

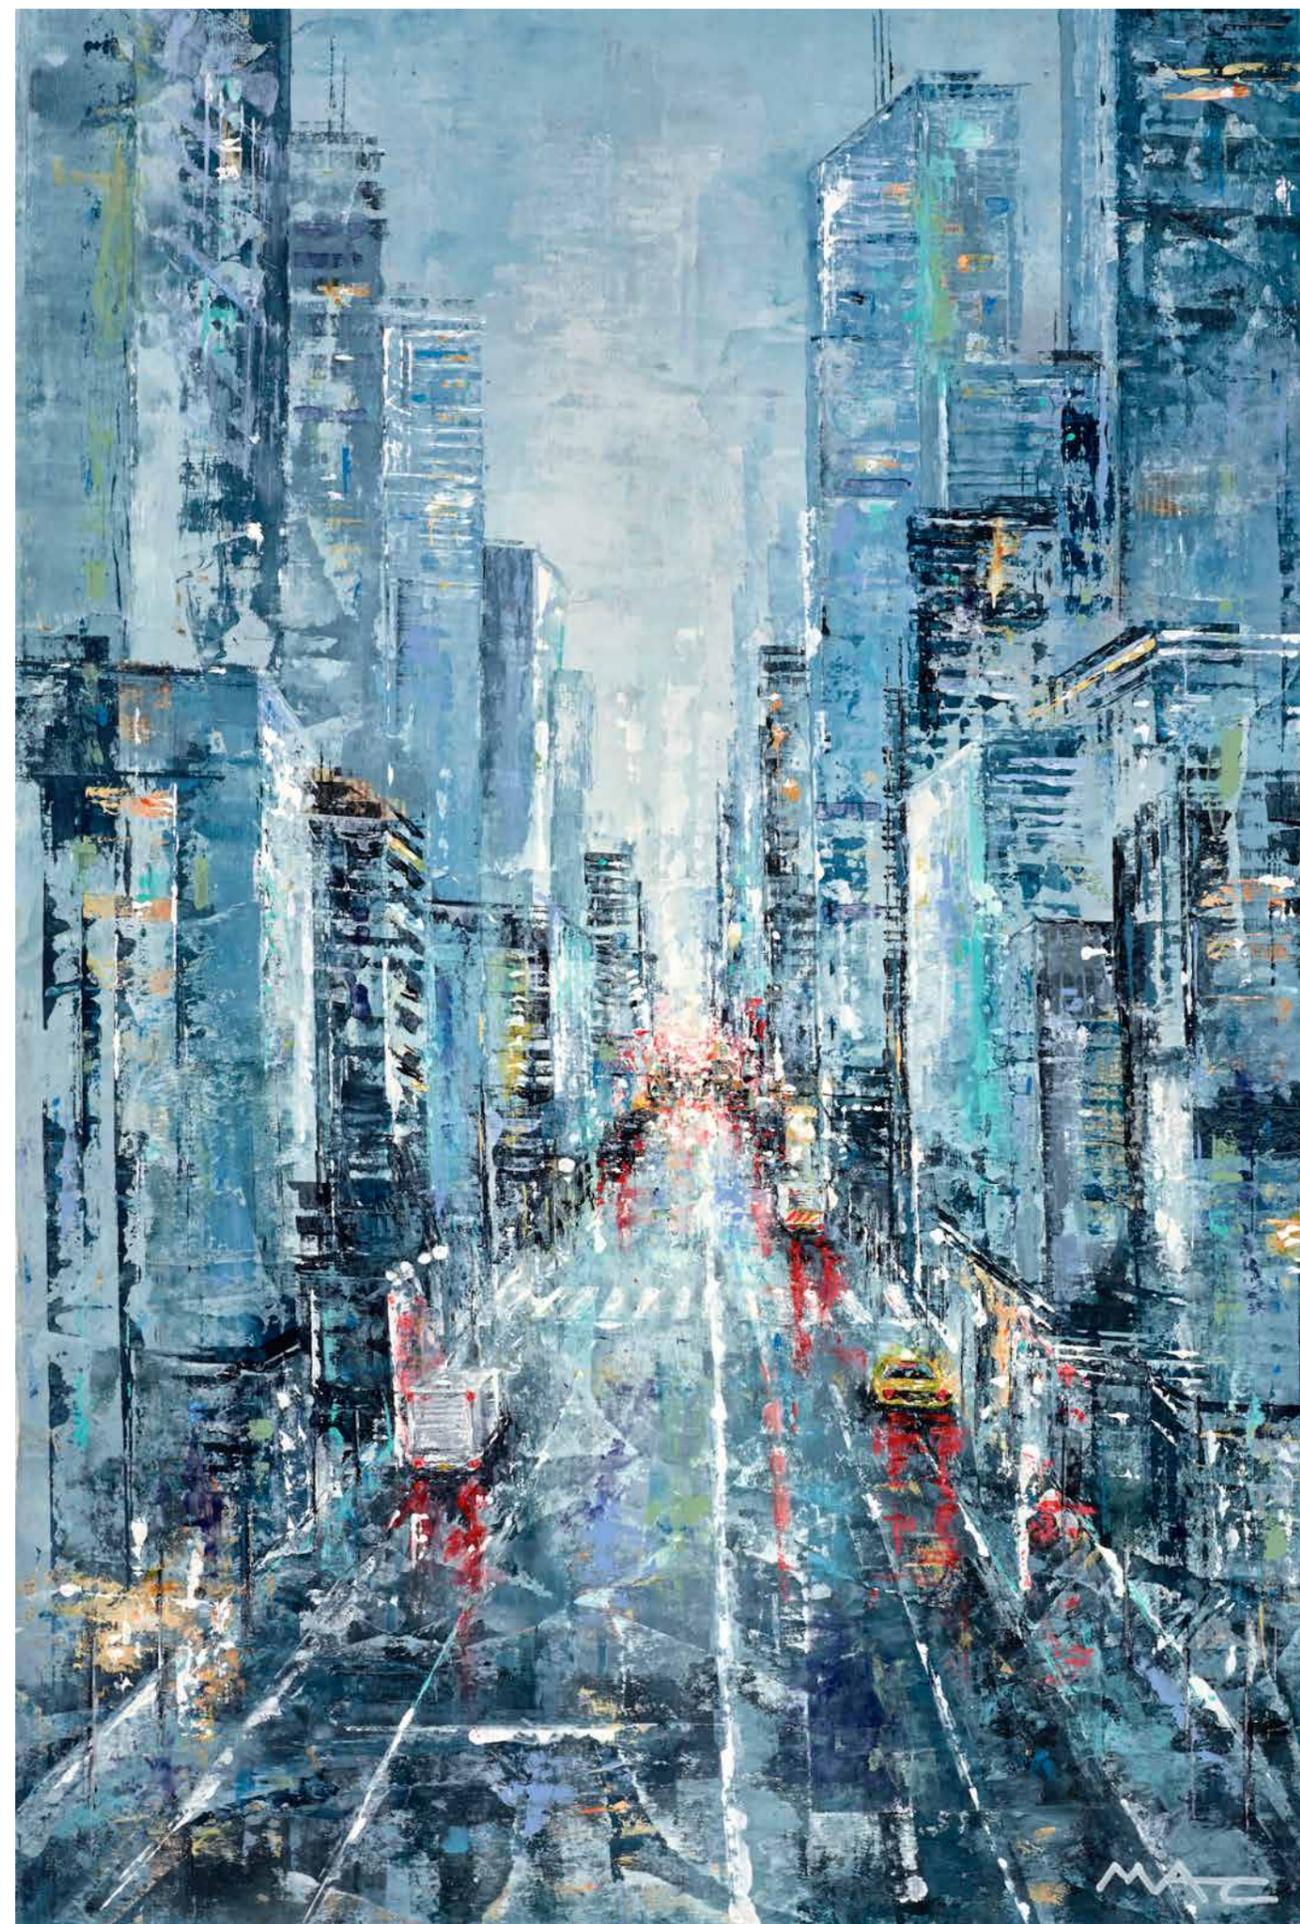

Mark has exhibited all over the UK with his work selling worldwide. He's been named as a finalist for 'Best up and coming Published Artist' of 2018, and a superb live painting exhibition at the Edinburgh Fringe.

Mark Curryer's bold, atmospheric cityscapes are inspired by distinctive architecture and the day to day trappings of urban life. He is fascinated by the effect of rain on the city, particularly at night, and the way the multiple light sources play in the reflections.

Mark's stunning images are created with little conventional brush work. Instead he uses a wide range of alternative tools including rollers and scrapers to achieve the textures and effects which are characteristic of his work. His use of newsprint adds a further layer of texture to each piece; while some of the exposed newsprint is by design, other parts occur naturally which reflects the unexpected and unpredictable nature of life lived at speed in the city.
